CONTENTS

Group photograph of participants ..... viii–ix

Preface

Bestor, T.H., Bhagwat, A.S., Blumenthal, R.M., Brooks, J.E., Marinus, M.G., Raleigh, E.A. and Szybalski, W. (Eds.) xi
Proceedings of the Third New England Biolabs Workshop on Biological DNA modification

Genes

(a) Distribution and diversity

Timinskas, A., Butkus, V. and Janulaitis, A. 3–11
Sequence motifs characteristics for DNA [cytosine-N4] and DNA [adenine-N6] methyltransferases. Classification of all DNA methyltransferases

Nyengaard, N., Vogensen, F.K. and Josephsen, J. 13–18
Restriction-modification systems in *Lactococcus lactis*

Stein, D.C., Gunn, J.S., Radlinska, M. and Piekarowicz, A. 19–22
Restriction and modification systems of *Neisseria gonorrhoeae*

(b) Cloning and organization

Lubys, A. and Janulaitis, A. 25–29
Cloning and analysis of the plasmid-borne genes encoding the *Bsp*6I restriction and modification enzymes

Nwankwo, D.O. 31–35
Cloning of a pair of genes encoding isoschizomeric restriction endonucleases from *Bacillus* species: the *Bsp*EI and *Bsp*MII restriction and modification systems

Skowron, P.M., Swaminathan, N., McMaster, K., George, D., Van Etten, J.L. and Mead, D.A. 37–41
Cloning and applications of the two/three-base restriction endonuclease R·*Cvi*JI from IL-3A virus-infected *Chlorella*

Kröger, M., Blum, E., Deppe, E., Düsterhöft, A., Erdmann, D., Kilz, S., Meyer-Rogge, S. and Möstl, D. 43–47
Organization and gene expression within restriction-modification systems of *Herpetosiphon giganteus*

Stankevičius, K., Povilionis, P., Lubys, A., Menkevičius, S. and Janulaitis, A. 49–53
Cloning and characterization of the unusual restriction-modification system comprising two restriction endonucleases and one methyltransferase

Vaišvila, R., Sliesaravičiūtė, Z., Kulakauskas, S. and Janulaitis, A. 55–57
Cloning of the *ppu21IM* gene using a in vivo selection method

Xu, G., Willert, J., Kapfer, W. and Trautner, T.A. ... 59
*Bsu*CI, a type-I restriction-modification system in *Bacillus subtilis*

Gopal, J., Yebra, M.J. and Bhagwat, A.S. 61–63
Cloning and characterization of the gene encoding the *Dsa*V methyltransferase

Degtyarev, S.K., Prikhod'ko, E.A., Rechkunova, N.I., Prikhod'ko, G.G. and Krasnykh, V.N. 65–66
Biochemical characterization of *Vsp*I methyltransferase

(c) Mobilization potential

Brassard, S., Paquet, H. and Roy, P.H. 69–72
A transposon-like sequence adjacent to the *Acc*I restriction-modification operon

Calvin\Koons, M.D. and Blumenthal, R.M. 73–79
Characterization of p*Pvu*1, the autonomous plasmid from *Proteus vulgaris* that carries the genes of the *Pvu*II restriction-modification system

Vaišvila, R., Vilkaitis, G. and Janulaitis, A. 81–84
Identification of a gene encoding a DNA invertase-like enzyme adjacent to the *Pae*R7I restriction-modification system

Proteins

(a) Purification and characterization

Tucholski, J., Skowron, P.M. and Podhajska, A.J. 87–92
*Mme*I, a class-IIS restriction endonuclease: purification and characterization

Karyagina, A.S., Lunin, V.G., Levtchenko, I.Y., Labbé, D., Brousseau, R., Lau, P.C.K. and Nikolskaya, I.I. .. 93–96
The *Sso*II and *Nla*X DNA methyltransferases: overproduction and functional analysis

Kupper, D., Reuter, M. and Krüger, D.H. 97–98
Overproduction of His-tagged *Eco*RII restriction endonuclease and terminally deleted mutant proteins

Dedkov, V.S., Rechkunova, N.I., Prihod'ko, E.A., Kileva, E.V., Kusner, Y.S., Verchozina, V.A. and Degtyarev, S.K. 99–100
*Cci*NI, an isoschizomer of *Not*I from *Curtobacterium citreum* recognizes 5′-GC↓GGCCGC-3′

Piekarowicz, A. and Stein, D.C. 101–102
Purification and characterization of a new DNA methyltransferase from *Neisseria gonorrhoeae*

Schumann, J., Willert, J., Wild, C., Walter, J. and Trautner, T.A. 103–104
M·*Bss*HII: a new multispecific C5-DNA-methyltransferase

Szilák, L., Finta, C., Patthy, A., Venetianer, P. and Kiss, A. 105
Self-methylation of the M·*Bsp*RI methyltransferase

Blum, E., Horst, G. and Kröger, M. 107–108
PCR-directed preparation and single-step purification of highly active histidine-tagged restriction endonuclease *Hgi*BI (GGWCC)

Vitor, J.M.B. and Morgan, R.D. 109–110
Two novel restriction endonucleases from *Campylobacter jejuni*

(b) Mutational analysis

Grabowski, G., Jeltsch, A., Wolfes, H., Maass, G. and Alves, J. 113–118
Site-directed mutagenesis in the catalytic center of the restriction endonuclease *Eco*RI

Fisher, E.W., Yang, M.-T., Jeng, S.-t., Gardner, J.F. and Gumport, R.I. 119–121
Selection of mutations altering specificity in restriction-modification enzymes using the bacteriophage P22 challenge-phage system

Dryden, D.T.F., Willcock, D.F. and Murray, N.E. ... 123–124
Mutational analysis of conserved amino-acid motifs in *Eco*KI adenine methyltransferase

Kossykh, V.G., Schlagman, S.L. and Hattman, S. 125–126
Studies on the function of conserved sequence motifs in the T4 Dam-[N^6-adenine] and *Eco*RII [C5-cytosine] DNA methyltransferases

Lange, C., Wild, C. and Trautner, T.A. 127–128
Altered sequence recognition specificity of a C5-DNA methyltransferase carrying a chimeric 'target recognizing domain'

(c) Crystal structures

Schluckebier, G., Labahn, J., Granzin, J., Schildkraut, I. and Saenger, W. 131–134
A model for DNA binding and enzyme action derived from crystallographic studies of the *Taq*I N^6-adenine-methyltransferase

O'Gara, M., McCloy, K., Malone, T. and Cheng, X. 135–138
Structure-based sequence alignment of three AdoMet-dependent DNA methyltransferases

Cheng, X., Balendiran, K., Schildkraut, I. and Anderson, J.E. 139–140
Crystal structure of the *Pvu*II restriction endonuclease

DNA-protein interactions

Ahmad, I., Krishnamurthy, V. and Rao, D.N. 143–147
DNA recognition by the *Eco*P15I and *Eco*PI modification methyltransferases

Brevnov, M.G., Kubareva, E.A., Romanova, E.A., Volkov, E.M., Karyagina, A.S., Nikolskaya, I.I. and Gromova, E.S. 149–152
Interaction of the *Mva*I and *Sso*II methyltransferases with DNAs altered at the central base pair of the recognition sequence

Erskine, S.G. and Halford, S.E. 153–156
Interactions of the *Eco*RV restriction endonuclease with fluorescent oligodeoxynucleotides

Jeltsch, A., Pleckaityte, M., Selent, U., Wolfes, H., Siksnys, V. and Pingoud, A. 157–162
Evidence for substrate-assisted catalysis in the DNA cleavage of several restriction endonucleases

Klimašauskas, S. and Roberts, R.J. 163–164
Disruption of the target G-C base-pair by the *Hha*I methyltransferase

Krüger, D.H., Kupper, D., Meisel, A., Tierlich, M., Reuter, M. and Schroeder, C. 165
Restriction endonucleases functionally interacting with two DNA sites

Kubareva, E.A., Volkov, E.M., Vinogradova, N.L., Kanevsky, I.A., Oretskaya, T.S., Kuznetsova, S.A., Brevnov, M.G., Gromova, E.S., Nevinsky, G.A. and Shabarova, Z.A. 167–171
Modified substrates as probes for studying uracil-DNA glycosylase

Petrauskene, O.V., Gromova, E.S., Romanova, E.A., Volkov, E.M., Oretskaya, T.S. and Shabarova, Z.A. 173–176
DNA duplexes containing methylated bases or non-nucleotide inserts in the recognition site are cleaved by restriction endonuclease R·*Eco*RII in presence of canonical substrate

Renbaum, P. and Razin, A. 177–179
Interaction of M·*Sss*I and M·*Hha*I with single-base mismatched oligodeoxynucleotide duplexes

Sektas, M., Kaczorowski, T. and Podhajska, A.J. 181–185
Interaction of the *Mbo*II restriction endonuclease with DNA

Sheflyan, G.Y., Kubareva, E.A., Volkov, E.M., Oretskaya, T.S., Gromova, E.S. and Shabarova, Z.A. 187–190
Chemical cross-linking of *Mva*I and *Eco*RII enzymes to DNA duplexes containing monosubstituted pyrophosphate internucleotide bond

Regulation

Adams, G.M. and Blumenthal, R.M. 193–199
Gene *pvuIIW*: a possible modulator of *Pvu*II endonuclease subunit association

Shivapriya, R., Prasad, R., Narayanan, I.L., Krishnaswamy, S. and Dharmalingam, K. 201–207
Expression of the *mcrA* gene of *Escherichia coli* is regulated post-transcriptionally, possibly by sequestration of the Shine-Dalgarno region

Lacks, S.A., Greenberg, B. and Sabelnikov, A.G. 209–212
Possible regulation of DNA methyltransferase expression by RNA processing in *Streptococcus pneumoniae*

Rasmussen, L.J., Løbner-Olesen, A. and Marinus, M.G. 213–215
Growth-rate-dependent transcription initiation from the *dam P2* promoter

Rimšelienė, R., Vaišvila, R. and Janulaitis, A. 217–219
The *eco72IC* gene specifies a *trans*-acting factor which influences expression of both DNA methyltransferase and endonuclease from the *Eco*72I restriction-modification system

Fernandez, M., Soliveri, J., Novella, I.S., Yebra, M.J., Barbés, C. and Sánchez, J. 221–223
Effect of 5-azacytidine and sinefungin on *Streptomyces* development

King, G. and Murray, N.E. 225
Modification enhancement and restriction alleviation by bacteriophage λ

Sohail, A., Ives, C.L. and Brooks, J.E. 227–228
Purification and characterization of C·*Bam*HI, a regulator of the *Bam*HI restriction-modification system

Kelleher, J.E. and Raleigh, E.A. 229–230
On the regulation and diversity of restriction in *Escherichia coli*

Alvarez, M.A., Gomez, A., Gomez, P. and Rodicio, M.R. 231–232
Expression of the *Sal*I restriction-modification system of *Streptomyces albus* G in *Escherichia coli*

Eukaryotic methylation

(a) Protists

Van Nuland, T.A., Capowski, E.E. and Karrer, K.M. 235–237
Position effect for adenine methylation in the macronuclear DNA of *Tetrahymena*

(b) Animals and Man

Doerfler, W., Orend, G., Schubbert, R., Fechteler, K., Heller, H., Wilgenbus, P. and Schröer, J. 241–245
On the insertion of foreign DNA into mammalian genomes: mechanism and consequences

Caiafa, P., Reale, A., Santoro, R., D'Erme, M., Marenzi, S., Zardo, G. and Strom, R. 247–251
Does hypomethylation of linker DNA play a role in chromatin condensation?

Strom, R., Santoro, R., D'Erme, M., Mastrantonio, S., Reale, A., Marenzi, S., Zardo, G. and Caiafa, P. 253–256
Specific variants of H1 histone regulate CpG methylation in eukaryotic DNA

Gaston, K. and Fried, M. 257–259
CpG methylation and the binding of YY1 and ETS proteins to the *Surf-1/Surf-2* bidirectional promoter

Martin, V., Ribieras, S., Song-Wang, X., Rio, M.-C. and Dante, R. 261–264
Genomic sequencing indicates a correlation between DNA hypomethylation in the 5′ region of the *pS2* gene and its expression in human breast cancer cell lines

Jost, J.-P. and Jost, Y.-C. 265–266
Mechanism of active DNA demethylation during embryonic development and cellular differentiation in vertebrates

(c) Plants

Nebendahl, A. and Bäumlein, H. 269–272
Analysis of overlapping cDNA clones specific for a putative second DNA methyltransferase-encoding gene in *Arabidopsis thaliana*

Ashapkin, V.V., Antoniv, T.T. and Vanyushin, B.F. ... 273–277
Methylation-dependent binding of wheat nuclear proteins to the promoter region of ribosomal RNA genes
Vlasova, T.I., Demidenko, Z.N., Kirnos, M.D. and Vanyushin, B.F. ... 279–281
In vitro DNA methylation by wheat nuclear cytosine DNA methyltransferase: effect of phytohormones
Buryanov, Y.I., Zakharchenko, N.S., Shevchuk, T.V. and Bogdarina, I.G. ... 283–287
Effect of the M·*Eco*RII methyltransferase-encoding gene on the phenotype of *Nicotiana tabacum* transgenic cells
Pradhan, S., Houlston, C., Cummings, M. and Adams, R.L.P. ... 289–291
CG and CNG methyltransferases in plants
